

Ball Screw Actuators

Stainless Steel
High Speed

bj·gear

transmission is our business

Our ball screw actuator is made of stainless steel and in a hygienic wash-down design which makes it ideal for the food, process and medical industry etc. Due to the ball screw, the linear speed can reach up to 1,250 mm/s at a very high efficiency.
The dynamic force is up to 15,000 N.

The optimum utilization of the actuator is achieved when using a servomotor making a very high acceleration, step motion and precise control of the movement possible.
The actuator can also be supplied with an AC or DC motor.

Features:

- **Stainless steel in hygienic wash-down design**
- **Easy and simple to incorporate**
- **Compact and modular design**
- **Very high-speed and smooth movements**
- **25 mm ball screw spindle, pitch 5-25 mm**
- **Sturdy and reliable**
- **Repeatable**

The ball screw actuator has the following performance parameters:

- Dynamic force up to 15,000 [N]
- Linear speed up to 1,250 [mm/s]

These performance parameters make the actuator very attractive to movements carried out by pneumatic or hydraulic cylinders.

The design is characterized by its easy and sturdy structure and the modular design gives an extremely large flexibility as to choice of stroke length, mounting possibilities, connections, grease types including food grade grease for the food industry etc.

If requested our actuator can be customized for specific needs.

- **Low backlash**
- **Efficient**
- **AC, DC or servo motors**
- **Lubrication grease for the food industry on request**
- **Customized designs**
- **Competitive prices**
- **Short delivery time**
